## Fascination Icestocksport

You take your 'stock', discuss your strategy with your team ('mass' or 'stock' shoot), choose a base for your stock (a 'color'), take place on the mark, swing your stock, concentrate on your target ('daube' or another stock), and then let it slide!!!

*Every millimeter counts!*

## Multiple Disciplines

You can play icestock individually or in a team. Enjoy the traditional Team Game (4 vs. 4) or the precision-based Target Shooting (4 vs. 4, or individual ranking) or the power-driven Distance Shooting (individually). Ask your national association or federation, try this fascinating sport out and enjoy it as thousands of people already do all over the world!

## Tradition and Modernization

A drawing of Pieter Breughel, from 1565, gives for the first time evidence of people 'sliding stocks' on a frozen lake. However, since the beginning of the past century icestock found wide popularity and fascination among the people in the alpine regions of Europe, mainly in South Germany and Austria.

Usually, women and men of all ages play icestock outdoor (on frozen lakes or rivers) and indoor (in ice halls). Currently, icestock is a whole-year sport, and you can play it on asphalt using other base materials on your stock.

*Never give up, give all!*

## Internationalization

IFI promotes and supports Icestocksport everywhere, for example in Colombia.

*There are two types of people: those who play icestock, and those who should...*

## You score, your team wins!

European Championships in Distance Shooting (Feb-2013, Austria); European Championships for Youth and Juniors in Team and Target Shooting (Feb-2013, Austria); European Championships for Women and Men in Team and Target Shooting (Mar-2013, Slovenia); European Cup in Distance Shooting (May-2013, Germany); America Cup for Women and Men in Team and Target Shooting (Jul.-2013, Paraguay); Youth Grand Prix U16 (Aug.-2013, Slovenia)..
